0000 00 0000 000000 0000 000000:

1.

How to use a drain auger: A drain auger is a tool used to clear clogs in drains. It consists of a long, flexible metal cable with a small, sharp, hook-like end. The cable is inserted into the drain, and the hook is used to catch and pull out the clog. The auger is used in a clockwise motion to break up the clog. Once the clog is cleared, the auger is removed from the drain.
2.

How to use a drain snake: A drain snake is a tool used to clear clogs in drains. It consists of a long, flexible metal cable with a small, sharp, hook-like end. The cable is inserted into the drain, and the hook is used to catch and pull out the clog. The snake is used in a clockwise motion to break up the clog. Once the clog is cleared, the snake is removed from the drain.
